

MATTHEW LAKIN

Department of Computer Science
Center for Biomedical Engineering
University of New Mexico
Albuquerque, NM 87131

(505) 277-3351

mlakin@unm.edu

<https://www.cs.unm.edu/~mlakin>

Research Interests

Computational biodesign, domain-specific languages for biological modeling, DNA nanotechnology, synthetic biology.

Education

- Ph.D. in Computer Science, University of Cambridge, UK, 2010.
 - Thesis title: *“An executable meta-language for inductive definitions with binders.”*
 - Advisor: Prof. Andrew M. Pitts.
- M.A. (Cantab), University of Cambridge, UK, 2009.
- B.A. (Hons) in Computer Science, University of Cambridge, UK, 2005.

Positions

- 2020–present. Assistant Professor (by courtesy), Department of Chemical & Biological Engineering, University of New Mexico.
- 2017–present. Assistant Professor, Department of Computer Science, University of New Mexico.
- 2014–present. Member, Center for Biomedical Engineering, University of New Mexico.
- 2015–2017. Research Assistant Professor, Department of Chemical & Biological Engineering, University of New Mexico.
- 2015–2017. Research Assistant Professor, Department of Computer Science, University of New Mexico.
- 2011–2015. Postdoctoral Scholar, Department of Computer Science, University of New Mexico. Advisor: Prof. Darko Stefanovic.
- 2009–2011. Postdoctoral Researcher, Biological Computation Group, Microsoft Research, Cambridge, UK. Advisor: Dr. Andrew Phillips.

Awards (7 total)

- 2021–present. NSF CAREER award. Project title: *“Robust heterochiral molecular computing in mammalian cells.”* Total award amount: \$650,000.
- 2021. UNM School of Engineering Junior Faculty Research Excellence award.
- 2020. STC.UNM Innovation Award.
- 2013–2015. Postdoctoral Training Fellowship, New Mexico Cancer Nanotechnology Training Center.
- 2007–2008. Queens’ College Munro Studentship. (Awarded for teaching excellence.)
- 2004. Queens’ College Foundation Scholarship. (Awarded for first class honors in Tripos examinations.)
- 2003. Queens’ College Exhibition. (Awarded for first class honors in Tripos examinations.)

Awards To My Students (3 total)

- 2023. UNM School of Engineering Outstanding Graduate Student Award for the combined Interdisciplinary Programs (Biomedical Engineering, Nanoscience & Microsystems Engineering, and Optical Science & Engineering) awarded to my graduate student, **Tracy L. Mallette** (Ph.D. in Biomedical Engineering).
- 2023. NSF Graduate Research Fellowship awarded to my graduate student, **Andrew Gutierrez** (Ph.D. in Biology).
- 2022. Poster Award at the 18th Annual Meeting of the Oligonucleotide Therapeutics Society awarded to my graduate student, **Tracy L. Mallette** (Ph.D. in Biomedical Engineering).

Grants (14 total)

Active Grants (6 total)

‡ = postdoctoral researcher advised by Lakin.

- Principal Investigator, National Science Foundation award 2312215, *“FET: Small: Simulation-guided design of heterochiral DNA nanostructures for biomaterials applications.”*
 - Total award amount: \$500,000.
 - UNM portion: \$500,000.
 - Project period: 10/01/2023–09/30/2026.
 - PI: Matthew R. Lakin; Co-PI: William P. Bricker (UNM).
- Co-Principal Investigator, National Science Foundation award 2318897, *“URoL:ASC: Biosensors for field detection of aqueous heavy metals: a collaboration with Native American communities.”*
 - Total award amount: \$3,000,000.
 - UNM portion: \$2,500,500.

- Award period: 08/15/2023–07/31/2028.
- PI: Gabriel P. López (UNM); Co-PIs: Matthew R. Lakin, Nick J. Carroll (UNM), José Cerato (UNM), Abraham Meles (Navajo Technical University).
- Co-Principal Investigator, National Science Foundation award 2124308, “*Collaborative Research: Toward lifelike synthetic cells via engineered control of DNA replication.*”
 - Total award amount: \$1,095,798.
 - UNM portion: \$414,071.
 - Award period: 08/15/2021–07/31/2024.
 - PI: James E. Chappell (Rice University); Co-PIs: Matthew R. Lakin, **Peter W. Davenport**[‡] (UNM), Emma K. Frow (Arizona State University).
- Co-Principal Investigator, National Science Foundation award 2123465, “*Synthetic P-bodies: Coupling gene expression and ribonucleoprotein granules in synthetic cell vesicles for sensing and response.*”
 - Total award amount: \$992,280.
 - UNM portion: \$704,216.
 - Award period: 08/01/2021–07/31/2024.
 - PI: Gabriel P. López (UNM); Co-PIs: Matthew R. Lakin, Katarzyna P. Adamala (University of Minnesota), William Gannon (UNM).
- **Principal Investigator, National Science Foundation award 2044838, “*CAREER: Robust heterochiral molecular computing in mammalian cells.*”**
 - **Total award amount: \$650,000.**
 - **UNM portion: \$650,000.**
 - **Award period: 04/01/2021–03/31/2026.**
 - **PI: Matthew R. Lakin (sole investigator).**
- Principal Investigator, National Science Foundation award 1814906, “*SHF: Small: Models and design tools for tethered molecular circuits.*”
 - Total award amount: \$450,000.
 - UNM portion: \$450,000.
 - Award period: 06/15/2018–05/31/2024.
 - PI: Matthew R. Lakin (sole investigator).

Completed Grants (8 total)

- Project Investigator, National Institutes of Health NIGMS grant P20GM103451 via NM-INBRE, “*Cell-free design and implementation of CRISPR guide RNA switches.*”
 - Total award amount: \$109,237.
 - UNM portion: \$109,237.
 - Award period: 05/01/2019–03/31/2024.
 - PI: Matthew R. Lakin (sole investigator).

- Co-Principal Investigator, National Science Foundation award 1935087, *“Synthetic cells that can learn without evolution.”*
 - Total award amount: \$1,000,000.
 - UNM portion: \$203,171.
 - Award period: 09/15/2019–08/31/2023.
 - PI: James M. Carothers (University of Washington); Co-PIs: Matthew R. Lakin, Irene Chen (University of California Los Angeles), Pamela Peralta-Yahya (Georgia Tech), Emma K. Frow (Arizona State University).
- Co-Principal Investigator, National Science Foundation award 2031774, *“EAGER: Engineered, Smart, Nucleic Acid-Binding, Intrinsically Disordered Proteins to Enable Ubiquitous Detection of Viral Pathogens and Diagnosis.”*
 - Total award amount: \$300,000.
 - UNM portion: \$300,000.
 - Award period: 07/01/2020–06/30/2023.
 - PI: Gabriel P. López (UNM); Co-PIs: Matthew R. Lakin, Nick J. Carroll (UNM), David S. Peabody (UNM).
- Co-Principal Investigator, National Science Foundation award 2202396, *“Student and Postdoc Travel Support for DNA28.”*
 - Total award amount: \$20,000.
 - UNM portion: \$20,000.
 - Award period: 03/01/2022–02/28/2023.
 - PI: Darko Stefanovic (UNM); Co-PIs: Matthew R. Lakin.
- Co-Principal Investigator, National Science Foundation award 1763718, *“SHF: Collaborative Research: Biocompatible I/O interfaces for robust bioorthogonal molecular computing.”*
 - Total award amount: \$300,000.
 - UNM portion: \$200,000.
 - Award period: 10/01/2018–09/30/2022.
 - PI: Darko Stefanovic (UNM); Co-PIs: Matthew R. Lakin, Milan Stojanovic (Columbia University).
- Co-Principal Investigator, National Science Foundation award 1518861, *“AF: Large: Collaborative Research: Molecular computing for the real world.”*
 - Total award amount: \$2,000,000.
 - UNM portion: \$934,358.
 - Award period: 09/01/2015–08/31/2022.
 - PI: Darko Stefanovic (UNM); Co-PIs: Matthew R. Lakin, Steven Graves (UNM), Lydia Tapia (UNM), Milan Stojanovic (Columbia University), Sergei Rudchenko (Hospital for Special Surgery), Christof Teuscher (Portland State University).
- Co-Principal Investigator, National Science Foundation award 1843958, *“RoL: EAGER: DESYN-C³: Programmable control of metabolism in synthetic cells using intrinsically disordered proteins.”*

- Total award amount: \$299,986.
- UNM portion: \$299,986.
- Award period: 10/01/2018–09/30/2021.
- PI: Nick J. Carroll (UNM); Co-PI: Matthew R. Lakin.
- Principal Investigator, National Science Foundation award 1525553, “AF: SHF: Small: Adaptive molecular computation using buffered strand displacement networks.”
 - Total award amount: \$449,999.
 - UNM portion: \$449,999.
 - Award period: 09/01/2015–08/31/2020.
 - PI: Matthew R. Lakin; Co-PIs: Darko Stefanovic (UNM), Steven Graves (UNM).

Patents (5 total)

‡ = postdoctoral scholar advised by Lakin; † = graduate student advised by Lakin.

- Matthew R. Lakin, **Tracy L. Mallette**[†], Darko Stefanovic, and Milan N. Stojanovic, *Heterochiral translators and molecular circuits*, US patent application, 2022
- Matthew R. Lakin, Carl W. Brown, III, Darko Stefanovic, and Steven W. Graves, *Signal propagation biomolecules, devices and methods*, US patent number 10,221,446, 2019
- Matthew R. Lakin and Nick J. Carroll, *Programmable control of metabolism in synthetic cells using intrinsically disordered proteins*, US provisional patent application, 2018
- Matthew R. Lakin and **Peter W. Davenport**[‡], *Engineering stimulus-responsive effectors for cell-specific control of gene expression*, US provisional patent application, 2018
- Matthew R. Lakin and Andrew Phillips, *Stochastic simulation of multi-language concurrent systems*, US patent application number 13/091,950, patent pending, 2011

Publications (57 total)

‡ = postdoctoral scholar advised by Lakin; † = graduate student advised by Lakin; ★ = undergraduate student advised by Lakin.

Edited Volumes (1 total)

- Matthew R. Lakin and Petr Šulc, Eds., *27th International Conference on DNA Computing and Molecular Programming (DNA 27)*, vol. 205, Leibniz International Proceedings in Informatics (LIPIcs), Schloss Dagstuhl – Leibniz-Zentrum für Informatik, 2021, ISBN: 978-3-95977-205-1. DOI: 10.4230/LIPIcs.DNA.27

Book Chapters (4 total)

- Matthew R. Lakin, Carlo Spaccasassi, and Andrew Phillips, “Computational design of nucleic acid circuits: Past, present, and future,” in *Visions of DNA Nanotechnology at 40 for the Next 40*, ser. Natural Computing Series, N. Jonoska and E. Winfree, Eds., Springer, 2023, ch. 18, pp. 311–346. DOI: 10.1007/978-981-19-9891-1_18
- Matthew R. Lakin, Darko Stefanovic, and Milan N. Stojanovic, “Diverse applications of DNazymes in computing and nanotechnology,” in *Ribozymes*, S. Müller, B. Masquida, and W. Winkler, Eds., Wiley, 2021, ch. 25, pp. 633–660. DOI: 10.1002/9783527814527.ch25

Ph.D. Students Advised And Graduated (3 total)

- Dr. Sarika Kumar (Computer Science Ph.D. student, 2018–2023).
 - Ph.D. thesis committee chair.
 - Graduated with a Ph.D. in Computer Science in Fall 2023.
 - Thesis title: “*Computational Study of the Effect of Geometry on Molecular Interactions.*”
- Dr. Tracy Mallette (Biomedical Engineering Ph.D. student, 2017–2023).
 - Ph.D. thesis committee chair.
 - Graduated with a Ph.D. in Biomedical Engineering with Distinction in Summer 2023.
 - Thesis title: “*Heterochiral DNA Nanotechnology for Biomedical Applications.*”
 - Nominated for the UNM Tom L. Popejoy Dissertation Prize in 2024.
 - Won the UNM School of Engineering Outstanding Graduate Student Award for the combined Interdisciplinary Programs (Biomedical Engineering, Nanoscience & Microsystems Engineering, and Optical Science & Engineering) in 2023.
 - Won a Poster Award at the 18th Annual Meeting of the Oligonucleotide Therapeutics Society in 2022.
 - Voted 1st runner-up for the DNA28 Best Student Presentation Award in 2022.
 - Also received an M.S. in Biomedical Engineering.
 - Currently a postdoctoral researcher at the University of Washington.
- Dr. David Arredondo (Nanoscience and Microsystems Engineering Ph.D. student, 2017–2022).
 - Ph.D. thesis committee chair.
 - Graduated with a Ph.D. in Nanoscience and Microsystems Engineering with Distinction in Fall 2022.
 - Thesis title: “*Control Mechanisms for Adaptive Nanoscale Devices.*”
 - Also received an M.S. in Computer Science as a dual status student.
 - Currently a postdoctoral researcher at the University of New Mexico Health Sciences Center.
 - Mentored as a post-baccalaureate student, 2016–2017.

M.S. Students Advised And Graduated (3 total)

- Kaitlin Eversole (Biomedical Engineering M.S. student, 2020–2023).
 - Graduated with an M.S. in Biomedical Engineering in Spring 2023.
 - Carried out research on CRISPR transcriptional circuits in *E. coli*.
 - Currently a metabolic engineer at Trait Biosciences.
- Randi Smith (Biomedical Engineering / Computer Science M.S. student, 2019–2022).
 - Graduated with an M.S. in Computer Science in Fall 2022.
 - Carried out research on controlling CRISPR systems in cell-free TXTL.
- James C. Boney (Biomedical Engineering M.S. student, 2018).
 - Graduated with an M.S. in Biomedical Engineering in 2018.
 - Carried out research on controlling CRISPR systems in cell-free TXTL.
 - Currently a lab scientist at New Mexico Department of Health.

Current Graduate Students (2 total)

- Anshika Mishra (Biomedical Engineering Ph.D. student, 2024–present).
 - Ph.D. thesis committee chair.
- Andrew Gutierrez (Biology Ph.D. student, 2023–present).
 - Ph.D. thesis committee co-chair.
 - Awarded an NSF Graduate Research Fellowship.

Undgraduate Students Advised (7 total)

- Sameen Jawadi (Biology undergraduate student, 2021–present).
- Jacob McCullough (Computer Science undergraduate student, 2020–2021).
- Luis Paez Beltran (Biochemistry undergraduate student, 2019–2021).
 - Currently a lab scientist at the UNM Health Science Center.
- Kelsie Herzer (Chemical Engineering undergraduate student, 2018–2020).
 - Currently in the Civil, Environmental and Sustainable Engineering Ph.D. program at Arizona State University.
 - Received an NSF Graduate Research Fellowship.
- Christopher Fetrow (Chemistry / Physics undergraduate student, 2016–2020).
 - Currently in the Nanoscience and Microsystems Engineering Ph.D. program at UNM, working with Prof. Shuya Wei.
- Danielsen Moreno (General Engineering undergraduate student, Central New Mexico Community College, 2018).
- Julian Weisburd (Computer Science undergraduate student, 2017).

Other Advisees (2 total)

- Research faculty advisor, University of New Mexico. Research professors mentored (1 total):
 - Dr. Peter W. Davenport (2020–2023).
 - Currently a systems integration and testing engineer at Sceye, Inc.
 - Previously a postdoctoral scholar in my group (2018–2020).
- Technical staff advisor, University of New Mexico. Technical staff members mentored (1 total):
 - Dr. Caroline Rempe (part-time faculty member, Central New Mexico Community College, 2021–present).

Other Mentees (37 total)

- Graduate student mentor, University of New Mexico. Students mentored (15 total):
 - Emmanuel Ogbuewu (Chemistry Ph.D. student, 2024–present).
 - Ph.D. research proposal committee member.
 - Md Rafiqul Islam Rupam (Chemistry Ph.D. student, 2023–present).
 - Ph.D. research proposal committee member.
 - Sajjad Khan (Nanoscience and Microsystems Engineering Ph.D. student, 2021–present).
 - Candidacy exam committee member.
 - Andisheh Dadashi (Computer Science Ph.D. student, 2021–2024).
 - Ph.D. dissertation committee member.
 - Tongtong Li (Chemistry Ph.D. student, 2020–2024).
 - Ph.D. dissertation committee member.
 - Amy Stevens (Chemistry Ph.D. student, 2020–2024).
 - Ph.D. dissertation committee member.
 - Adán Myers y Gutiérrez (Nanoscience and Microsystems Engineering Ph.D. student, 2013–2019).
 - Ph.D. dissertation committee member.
 - Thesis title: *“Diagnostic Sequence Detection Against a Complex Background using a DNA Molecular Computation Framework.”*
 - Subsequently a postdoctoral researcher at Los Alamos National Laboratory.
 - Aurora Fabry-Wood (Biomedical Engineering Ph.D. student, 2013–2018).
 - Co-advisor, Ph.D. thesis committee member.
 - Thesis title: *“Compartmentalization of DNA-Based Molecular Computing Elements Using Lipid Bilayers.”*
 - M.S. committee member.
 - Subsequently a field application scientist at Berkeley Lights.
 - Qing Sun (Biomedical Engineering M.S. student, 2018).
 - M.S. committee member.
 - Dandan Mo (Computer Science Ph.D. student, 2013–2016).

- Ph.D. dissertation committee member.
- Thesis title: *“Molecular Circuits based on Molecular Spider System.”*
- Alireza Goudarzi (Computer Science Ph.D. student, 2013–2016).
 - Subsequently a postdoctoral researcher at the RIKEN Brain Science Institute, Wakō, Japan.
- Carl W. Brown, III (Biomedical Sciences Ph.D. student, 2011–2015).
 - Graduated with a Ph.D. with Distinction in June 2014.
 - Subsequently a postdoctoral researcher at the Naval Research Laboratory, Washington, DC, a staff scientist at the Wyss Institute, Harvard Medical School, Boston, MA, and at Sherlock Biosciences.
- David Mohr (Computer Science Ph.D. student, 2013–2015).
 - Ph.D. thesis committee member.
 - Thesis title: *“Stella: A Python-based Domain-Specific Language for Simulations.”*
 - Subsequently at Google, Boulder, CO.
- Amanda Minnich (Computer Science Ph.D. student, 2011–2014).
 - Now at Lawrence Livermore National Laboratory, Livermore, CA.
- Geoffrey Reedy (Computer Science M.S. student, 2013).
 - M.S. thesis committee member.
 - Thesis title: *“Design and Implementation of a Scala Compiler Backend Targeting the Low Level Virtual Machine.”*
- Undergraduate student mentor, University of New Mexico. Students mentored (8 total):
 - Madalyn Fetrow (Chemistry undergraduate student, summer 2014–2018).
 - Mische Hubbard (Chemical Engineering undergraduate student, 2016–2017).
 - Nicholas A. Baker (Chemical Engineering undergraduate student, 2014–2016).
 - Dominic Medina (Biochemistry undergraduate student, summer 2015).
 - Cameron Degani (Chemical Engineering undergraduate student, summer 2015).
 - Erin Sosebee (Computer Science undergraduate student, summer 2013).
 - Eli K. Horwitz (Chemical Engineering undergraduate student, 2012–2014).
 - Hannah E. West (Chemical Engineering undergraduate student, 2011).
- High school intern mentor, University of New Mexico. Students mentored (7 total):
 - Christian Poncho (Fall 2018–Spring 2019) Adityo Paul (Summer 2018), Priyanka Jain (Summer 2015), Holly Liu (Summer 2015), Rebecca DeLand (Summer 2014), Katherine Jordan (Summer 2013), Megan Williams (Summer 2013).
- Mentor for student team in graduate course BME 598: “Biodesign”, University of New Mexico. Students mentored (7 total):
 - Fall 2018: Amanda Sanchez, Neema Naeemi, Rohan Choraghe, Christopher Buksa, Marshall Klee, Daniel Sikora, Ushnik Ghosh. My team won \$50,000 in funding from the UNM School of Engineering and the UNM Clinical & Translational Science Center to develop their invention, a wheelchair attachment for stroke patients.

Courses Taught (18 total)

- 2016–present. Instructor, University of New Mexico. Multiple courses (18 total):
 - Spring 2024: Computer Science undergraduate / graduate course CS 468 / CS 568: “Computational Modeling for Bioengineering.”
 - This course was cross-listed as CS 468, CS 568, and BME 568.
 - Fall 2023: Computer Science graduate course CS 558: “Software Foundations.”
 - Spring 2023: Biomedical Engineering graduate course BME 556: “Protein and Nucleic Acid Engineering.”
 - This course was cross-listed as BME 556, CBE 499, CBE 515, CS 491, and CS 591.
 - Fall 2022: Computer Science graduate course CS 558: “Software Foundations.”
 - Spring 2022: Computer Science undergraduate / graduate course CS 468 / CS 568: “Computational Modeling for Bioengineering.”
 - This course was cross-listed as CS 468, CS 568, and BME 568.
 - Fall 2021: Computer Science graduate course CS 558: “Software Foundations.”
 - Spring 2021: Biomedical Engineering graduate course BME 556: “Protein and Nucleic Acid Engineering.”
 - This course was cross-listed as BME 556, CBE 499, CBE 515, CS 491, and CS 591.
 - Fall 2020: Computer Science graduate course CS 558: “Software Foundations.”
 - Spring 2020: Computer Science undergraduate / graduate course CS 365: “Introduction to Scientific Modeling.”
 - This course was cross-listed as CS 365, CS 491, CS 591, and BME 598.
 - Fall 2019: Computer Science graduate course CS 558: “Software Foundations.”
 - Fall 2019: Computer Science graduate course CS 592: “Colloquium.”
 - Spring 2019: Computer Science undergraduate course CS 251: “Intermediate Programming.”
 - Spring 2019: Biomedical Engineering graduate course BME 556: “Protein and Nucleic Acid Engineering.”
 - This course was cross-listed as BME 556, CBE 499, CBE 515, and CS 591.
 - Fall 2018: Computer Science graduate course CS 558: “Software Foundations.”
 - Spring 2018: Computer Science undergraduate course CS 365: “Introduction to Scientific Modeling.”
 - Fall 2017: Computer Science graduate course CS 558: “Software Foundations.”
 - Spring 2017: Computer Science undergraduate course CS 293: “Social and Ethical Issues in Computing.”
 - Fall 2016: Computer Science graduate course CS 558: “Software Foundations.”

Other Teaching

- 2012–2015. Guest lecturer, University of New Mexico. Multiple courses (5 total):
 - Computer Science graduate course CS 558: “Software Foundations.”

- Biomedical Engineering graduate course BME 556: “Protein and Nucleic Acid Engineering.”
- Nanoscience and Microsystems Engineering graduate course NSMS 518: “Synthesis of Nanostructures.”
- Chemical Engineering undergraduate course CHNE 361: “Biomolecular Engineering.”
- Chemical Engineering undergraduate CBE 417 / Biomedical Engineering graduate course BME 517: “Applied Biology for Biomedical Engineers.”
- 2005–2011. Computer Science supervisor, University of Cambridge. Served as teaching assistant for multiple undergraduate courses (10 total):
 - Programming in Java, Databases, Discrete Mathematics, Specification and Verification, Logic and Proof, Semantics of Programming Languages, Computation Theory, Types, Topics in Concurrency, Natural Language Processing.
- 2007–2009. Computer Science introductory undergraduate programming laboratory supervisor, University of Cambridge.

External Service

- 2022–present. Steering committee member, International Conference on DNA Computing and Molecular Programming (DNAXX).
- 2024. Reviewer for the National Science Foundation: ad hoc reviewer for ENG directorate (EFMA office).
- 2023. Reviewer for the Human Frontier Science Program research grant program, administered by the International Human Frontier Science Program Organization.
- 2023. Reviewer for the National Science Foundation: panel member for CISE directorate (CCF division).
- 2021–2022. Organizing committee co-chair, 27th International Conference on DNA Computing and Molecular Programming (DNA28), Albuquerque, NM, August 2022.
- 2022. Reviewer for the National Science Foundation: panel member for CISE directorate (CCF division).
- 2020–2021. Program committee co-chair, 27th International Conference on DNA Computing and Molecular Programming (DNA27), Oxford, UK, September 2021.
- 2018–2021. Organizing committee member, program committee member, virtual technology committee member, International Conference on Engineering Synthetic Cells and Organelles, held virtually, May 2020 and 2021.
- 2018–2021. Program committee member, International Conference on DNA Computing and Molecular Programming (DNAXX).
- 2021. Reviewer for the National Science Foundation: ad hoc reviewer for CISE directorate (CCF division), ad hoc reviewer for BIO directorate (MCB and DEB divisions).
- 2021. Reviewer for the Natural Sciences and Engineering Research Council of Canada (NSERC) Discovery Grant program.
- 2020. Reviewer for the National Science Foundation: panel member for GRF program, panel member and ad hoc reviewer for CISE directorate (CCF division), panel member for cross-cutting interdisciplinary programs.
- 2019. Reviewer for the National Science Foundation: panel member for ENG directorate (CBET division).
- 2018. Reviewer for the National Science Foundation: panel member for BIO directorate (MCB division), ad hoc reviewer for CISE directorate (CCF division), panel member for cross-cutting interdisciplinary programs.
- 2017–2018. Program committee member, 9th and 10th International Workshops on Biodesign Automation (IWBDAs 2017, 2018).
- 2017. Reviewer, British Computer Society Distinguished Dissertation award.
- 2017. Poster and oral presentation judge, UNM STEM Research Symposium.

- 2014–2021. Review editorial board member, *Frontiers in Computational Intelligence* (a specialty of *Frontiers in Robotics and AI*).
- 2014. Session chair, *Workshop on Computing with Biomolecules: From Network Motifs to Complex and Adaptive Systems* (satellite workshop of *ALife 2014* conference).
- 2014–2015. Program committee member, 1st and 2nd *International Workshops on Verification of Engineered Molecular Devices and Programs (VEMDP 2014, 2015)*.
- 2008–present. Invited peer reviewer for multiple journals (48 total):
 - *Nature*; *Nature Nanotechnology*; *Nature Microbiology*; *Proceedings of the National Academy of Sciences of the USA*; *Nature Communications*; *Journal of the American Chemical Society*; *ACS Synthetic Biology*; *Bioinformatics*; *Nucleic Acids Research*; *ACS Nano*; *Nano Letters*; *Angewandte Chemie International Edition*; *Advanced Functional Materials*; *Theoretical Computer Science*; *Journal of the Royal Society Interface*; *Science Advances*; *Chemical Science*; *Interface Focus*; *Royal Society Open Science*; *RSC Advances*; *BMC Bioinformatics*; *Nanoscale*; *ACS Applied Materials & Interfaces*; *Information & Computation*; *ChemBioChem*; *Advanced Biology*; *IEEE/ACM Transactions on Computational Biology and Bioinformatics*; *IEEE Transactions on Neural Networks and Learning Systems*; *IEEE Transactions on NanoBioscience*; *IEEE Transactions on Nanotechnology*; *IEEE Transactions on Emerging Topics in Computational Intelligence*; *IEEE Life Sciences Letters*; *IEEE Access*; *IEEE Design & Test*; *Proceedings of the Royal Society A*; *WIREs Nanomedicine & Nanobiotechnology*; *Journal of Nanobiotechnology*; *Artificial Intelligence in Medicine*; *Computational and Structural Biotechnology Journal*; *Natural Computing*; *BioSystems*; *Molecules*; *Analytical Methods*; *Journal of Symbolic Computation*; *Theory of Computing Systems*; *Interdisciplinary Sciences—Computational Life Sciences*; *International Journal of Parallel, Emergent, and Distributed Systems*; *International Journal of Molecular Sciences*.
- 2008–present. Invited peer reviewer for multiple conferences (7 total):
 - *International Conference on DNA Computing and Molecular Programming (DNA)*; *International Conference on Unconventional Computation and Natural Computation (UCNC)*; *International Conference on Functional Programming (ICFP)*; *International Colloquium on Automata, Languages, and Programming (ICALP)*; *European Symposium on Programming (ESOP)*; *IEEE International Symposium on Logic in Computer Science (LICS)*; *International Workshop on Biodesign Automation (IWBD)*.

University Service

- 2023. Member, Faculty annual awards selection committee, School of Engineering, University of New Mexico.
- 2021–present. Chair, Graduate admissions and recruitment committee, Department of Computer Science, University of New Mexico.
- 2018–present. Member, Graduate program committee, Department of Computer Science, University of New Mexico.
- 2018–2021. Member, Graduate admissions and recruitment committee, Department of Computer Science, University of New Mexico.

- 2018–2020. Member, Faculty hiring committee, Department of Computer Science, University of New Mexico.

Professional Society Memberships

- 2018–present. Member, American Association for the Advancement of Science (AAAS).
- 2018–present. Member, American Chemical Society (ACS).
- 2016–present. Member, Institute of Electrical and Electronics Engineers (IEEE).
- 2014–present. Member, Association for Computing Machinery (ACM).
- 2011–present. Member, International Society for Nanoscale Science, Computation and Engineering (ISNSCE).

Selected Invited Talks

- *“Declarative programming languages for molecular computing.”* Invited speaker as part of the Pittsposium workshop in honor of the retirement of Prof. Andrew Pitts, held at the University of Cambridge, Cambridge, UK, August 2023.
- *“Engineering molecules and cells for programmable biology.”* Invited speaker as part of University of Minnesota ECE colloquium talk series, February 2022.
- *“Information processing in synthetic cells.”* Invited speaker as part of the Build-A-Cell virtual seminar series, August 2021.
- *“Information processing in synthetic cells.”* Invited speaker at the Synthetic Approaches to Biology and Artificial Intelligence (SB-AI) workshop, a satellite workshop of the 2021 ALIFE conference, held virtually, July 2021.
- *“Information processing in synthetic cells.”* Invited speaker at the 2021 International Conference on Engineering Synthetic Cells and Organelles (SynCell 2021), held virtually, May 2021.
- *“Programming life using cell-free synthetic biology.”* Invited speaker at Biology Seminar, Northern New Mexico College, Española, New Mexico, September 2019.
- *“Modular verification of chemical reaction networks via serializability analysis.”* Invited keynote speaker, 2nd International Workshop on Verification of Engineered Molecular Devices and Programs (VEMDP 2015), San Francisco, California, July 2015.
- *“Theory and practice of molecular computing.”* Invited speaker at Biochemistry & Molecular Biology Seminar, University of New Mexico School of Medicine, Albuquerque, New Mexico, March 2015.

Selected Contributed Talks

- *“Heterochiral DNA for information processing in synthetic cells.”* International Conference on Engineering Synthetic Cells and Organelles (SynCell 2023), Minneapolis, Minnesota, May 2023.
- *“Protecting heterochiral DNA nanostructures against exonuclease-mediated degradation.”* Presented by graduate student Tracy Mallette at the 28th International Conference on DNA Computing and Molecular Programming (DNA28), Albuquerque, New Mexico, August 2022.
 - This presentation was voted 1st runner-up for the DNA28 Best Student Presentation Award.
- *“Robust heterochiral strand displacement using leakless translators.”* Presented by graduate student Tracy Mallette at the 26th International Conference on DNA Computing and Molecular Programming (DNA26), held virtually, September 2020.
- *“Supervised learning in a multi-layer, non-linear chemical neural network.”* Presented by graduate student David Arredondo at the 26th International Conference on DNA Computing and Molecular Programming (DNA26), held virtually, September 2020.
- *“Automated, constraint-based analysis of tethered DNA nanostructures.”* 23rd International Conference on DNA Computing and Molecular Programming (DNA23), Austin, Texas, September 2017.
- *“Towards temporal logic computation using DNA strand displacement reactions.”* International Conference on Unconventional Computation and Natural Computation, Fayetteville, Arkansas, June 2017.
- *“Supervised learning in an adaptive DNA strand displacement circuit.”* 21st International Conference on DNA Computing and Molecular Programming (DNA21), Boston, Massachusetts, August 2015.
- *“Abstract modelling of tethered DNA circuits.”* 20th International Conference on DNA Computing and Molecular Programming (DNA20), Kyoto, Japan, September 2014.
- *“Pattern formation by spatially organized approximate majority reactions.”* International Conference on Unconventional Computation and Natural Computation, London, Ontario, July 2014.
- *“Compiling DNA strand displacement reactions using a functional programming language.”* International Symposium on Practical Aspects of Declarative Languages, San Diego, California, January 2014.
- *“Modular verification of DNA strand displacement networks via serializability analysis.”* 19th International Conference on DNA Computing and Molecular Programming (DNA19), Tempe, Arizona, September 2013.
- *“Towards a biomolecular learning machine.”* International Conference on Unconventional Computation and Natural Computation, Orléans, France, September 2012.
- *“Modelling, simulating and verifying Turing-powerful strand displacement systems.”* 17th International Conference on DNA Computing and Molecular Programming (DNA17), Pasadena, California, September 2011.
- *“Resolving inductive definitions with binders in higher-order typed functional programming.”* European Symposium on Programming, York, United Kingdom, March 2009.

Selected Poster Presentations

‡ = postdoctoral scholar advised by Lakin; † = graduate student advised by Lakin; * = undergraduate student advised by Lakin.

- **Tracy L. Mallette[†]**, Diane S. Lidke, and Matthew Lakin. “*Heterochiral modifications enhance robustness and function of DNA in living human cells.*” 29th International Conference on DNA Computing and Molecular Programming (DNA29), Sendai, Japan, September 2023.
- **Kaitlin M. Eversole[†]**, **Peter W. Davenport[‡]**, and Matthew R. Lakin. “*Programmable genetic networks for synthetic cell engineering.*” International Conference on Engineering Synthetic Cells and Organelles (SynCell 2023), Minneapolis, Minnesota, May 2023.
- **Tracy L. Mallette[†]** and Matthew Lakin. “*Triblock heterochiral oligonucleotide nanotechnology for protection against exonuclease-mediated degradation.*” 18th Annual Meeting of the Oligonucleotide Therapeutics Society (OTS22), Phoenix, Arizona, October 2022.
 - This presentation won a Poster Award.
- **David Arredondo[†]** and Matthew Lakin. “*Operant conditioning of stochastic chemical reaction networks.*” 28th International Conference on DNA Computing and Molecular Programming (DNA28), Albuquerque, New Mexico, August 2022.
- **Sarika Kumar[†]** and Matthew Lakin. “*A geometric framework for reaction enumeration in computational nucleic acid devices.*” 28th International Conference on DNA Computing and Molecular Programming (DNA28), Albuquerque, New Mexico, August 2022.
- **David Arredondo[†]** and Matthew Lakin. “*Supervised learning in a multi-layer, non-linear chemical neural network.*” 26th International Conference on DNA Computing and Molecular Programming (DNA26), held virtually, September 2020. This poster was also nominated for a short oral presentation.
- Matthew Lakin, **Julian M. Weisburd^{*}**, and **Sarika Kumar[†]**. “*Structure sampling for rate estimation in tethered molecular circuits.*” 25th International Conference on DNA Computing and Molecular Programming (DNA25), Seattle, Washington, August 2019.
- Carlo Spaccasassi, Matthew Lakin, and Andrew Phillips. “*A logic programming language for computational nucleic acid devices.*” International Workshop on Biodesign Automation, Cambridge, UK, July 2019.
- Aurora Fabry-Wood, Madalyn E. Fetrow, Carl W. Brown, III, Nicholas A. Baker, Nadia Fernandez Oropeza, Andrew P. Shreve, Gabriel A. Montañó, Darko Stefanovic, Matthew Lakin, and Steven W. Graves. “*Monitoring DNA Reactions on a Fluid Microsphere Supported Lipid Bilayer Surface with Flow Cytometry.*” 23rd International Conference on DNA Computing and Molecular Programming (DNA23), Austin, Texas, September 2017.
- Keith Lidke, Diane Lidke, Cheyenne Martin, Farzin Farzam, Jeremy Edwards, Matthew Lakin. “*Multi-structure super-resolution imaging using sequential imaging and DNA strand displacement.*” 2018 Conference on Quantitative BioImaging in Göttingen, Germany, January 2018.
