

## Force.com Developer

### Description:

Do you stay up at night dreaming of cloud computing? Do you begin to salivate at the mere mention of SOA, MVC, and TDD? Is your daily existence already dependent on EC2? If so, ClosedWon LLC is currently recruiting experienced developers to build innovative applications on the leading SaaS and Elastic Computing platforms. This position provides a tremendous opportunity for professional growth within an exciting startup company environment. We are looking for candidates that are enthusiastic, professional, and confident. Ideal candidates will be driven by innovative technology and customer success. Must use technical acumen and teamwork to help convert plans into real solutions that work.

### Responsibilities:

- Work in small teams on multiple, fast paced projects
- Develop processes and methodologies to support a scalable development environment
- Continuously grow, improve, and enhance the code base
- Assist with the design and development of upcoming features and product versions
- Interact with business customers to understand customer needs and deliverables
- Become world-renowned expert in cloud computing and travel the world as SaaS evangelist

### Required Skills/Experience:

- A minimum of four years of commercial software development or IT industry experience
- B.S. in Computer Science, Software Engineering, MIS or equivalent work experience
- Knowledge of enterprise systems, CRM, SFA, and ERP
- Understanding of object oriented programming concepts
- Working knowledge of MVC frameworks
- Proficient with complete web application development stack, both front and back-end
- Hands-on with Java, Javascript/HTML/CSS/AJAX (Flex a plus), plus one or more of PHP, Python, Ruby
- Experience with one or more web platform APIs such as Google, Salesforce.com, Amazon
- S-Control development using AJAX toolkit and the Apex API
- Proven ability to design and integrate business processes across disparate systems
- Apex Code development, including SOAP web services and XML
- Custom webpage design & development using HTML, Javascript, and Visualforce
- Passion for technology and providing valuable, usable products to customers via the SaaS model
- Excellent analysis skills and the ability to develop processes and methodologies
- Excellent verbal and written communication skills
