

Homework 2

Due:Friday Jan 29

You will be given access to a physical machine and you must retrieve a file from the desktop(folder). Your grade will be based on two things.

1. The method you used to obtain the file.
2. The message as well as the method used to retrieve the message.

In order to do this homework assignment you must either come to office hours or make an appointment. Then I will give you a laptop and you must retrieve the file from the laptop and give back the laptop(before leaving).

When finished, email a concise description of how you completed both tasks described above to the turnin email(cs444544spring@gmail.com).

DO NOT!

1. Talk to your classmates, even at a high level, about the assignment.
2. Physically open or harm the laptops.

However, you may use the Internet.

Grading will be very straight forward.

Either 90 points for obtaining access to the machine without any additional hardware.

Or 80 points for obtaining access to the machine with additional hardware(flash drive/usb DVD rom)

Finally 10 points for the message along with a short description about how you were able to obtain it.
