

## **Ethics agreement for CS 491/591 Spring 2009**

I have completed the online course on responsible conduct of research, and either attended the lecture about ethics on Friday, 23 January 2009 or watched the ITV video. I understand the policies in the course syllabus regarding completing labs in a controlled environment, and know that I am expected to take full legal and ethical responsibility for anything that I do that violates those policies or deviates from what is necessary to complete the assignment.
