

# CS442/ECE432: Paper Reading Assignment

March 13, 2008

## Assignment

On March 13th there will be no class. Instead, read the paper “*Analyzing Scalability of Parallel Algorithms and Architectures*” by Vipin Kumar and Anshul Gupta. It is available through our class web site.

Summarize the metrics discussed in the paper. Concentrate on what these metrics mean rather than explaining how they are calculated.

Be concise in your answers and email them to [riesen@cs.unm.edu](mailto:riesen@cs.unm.edu) as a plain ASCII or a PDF file. Your email is due no later than March 25th.
