Homework 4 (20 points)

Due Friday, 4 December at 10:00am, either as a hardcopy turned in at the beginning of class or as an email to me (jedcrandall@gmail.com).

As always, you can check your answers with me via email. A small change, though: I will only grade something submitted as your final version, I can't keep digging through my email trying to give people partial credit for things that were less than half done at the time.

Do Exercise 5.10.1 on page 558 of the book. Assume that a and b are separate streams and do question 5.10.1 in two parts (a and b). 10 points each.
