

CS 152 - Lab 001

TA: Kage Weiss

Office Hours: T 3:30-5:00 Cochiti [SUB], or by appointment.

Contact: mmweiss@unm.edu

Website: <http://cs.unm.edu/~kageweiss/TA/cs152.html> -- **SLIDES POSTED**

- Sign in sheet located at whiteboard
- Today we are working on Library (Lab 7)

Library

This lab is fairly straightforward as most of the necessary methods are listed for you in the pdf. Writing them is up to you, however.

- Remember to be thoughtful about what methods and variables need to be public, and that all public methods require Javadoc comments. Publicity of the listed methods is given for you, make sure you understand *why* each method is the way it is.
- Instances of objects are, by nature, non-static. If you're running into errors with accessing your variables or methods, ensure you didn't slip the static keyword into the declaration.
